Mysore, Karnataka

SUMMARY

Aspiring Data Analyst with a strong foundation in SQL, Excel, Power BI, and Python, supported by hands-on training and real-world project experience. Skilled in data cleaning, analysis, visualization, and dashboard development to turn data into clear and useful insights. Eager to apply my analytical skills in a professional environment, learn from experienced professionals, and grow as a Data Analyst while contributing meaningfully to organizational goals.

SKILLS

Microsoft Excel: Pivot Tables, VLOOKUP, Advanced Formulas, Charts & Graphs
Google Sheets: Pivot Tables, Charts, Conditional Formatting, Data Validation, Logical Functions, Collaboration
SQL: Joins, Subqueries, Window Functions, CTEs, Data Cleaning, Query Optimization, Data Transformation
Power BI: Dashboard Development, KPI Reporting, Power Query, DAX, Data Visualization, Interactive Reports
Python: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Machine Learning (Linear Regression, Logistic Regression)
Analytics Skills: Data Storytelling, Statistical Analysis, Exploratory Data Analysis, Trend Analysis, Business Intelligence, Report Generation
Statistics & Mathematics: Descriptive stats, correlation, trend analysis and data storytelling
Tools & Platforms: MySQL Workbench, Power BI Desktop, VS Code, GitHub
Soft Skills: Analytical Thinking, Critical Thinking, Problem Solving, Communication, Teamwork, Time Management

PROJECTS

Sales Performance Analysis , Tools: SQL | Excel | Power BI

- Analyzed 10,000+ sales records to identify revenue trends, regional performance, and top-performing products
- Cleaned and prepared raw sales data using SQL and Excel by handling missing values and removing duplicates
- Built interactive Power BI dashboards to track key KPIs including revenue, profit, and monthly sales growth
- Delivered business-ready reports highlighting sales patterns to support management decision-making

Credit Risk Analysis & Prediction , Tools: SQL | Excel | Power BI | Python

- Analyzed customer financial data to identify risk factors and patterns affecting loan repayment behavior
- Cleaned and standardized raw data using SQL and Excel to ensure accuracy and consistency for analysis
- Performed exploratory data analysis in Python using Pandas and Seaborn to uncover customer risk categories
- Designed Power BI dashboards to present risk insights in a clear and actionable format for financial teams

Customer Churn Prediction , Tools: SQL | Power BI | Python

- Analyzed customer data to identify key patterns and factors driving churn and low retention rates
- Cleaned and prepared datasets using SQL and Python to ensure data quality before analysis
- Conducted exploratory data analysis in Python to understand customer behavior and churn trends
- Built Power BI dashboards to visualize churn patterns and retention insights for business stakeholders

COURSES

Data Analytics Training Program, Apponix Academy 2025 – 2026 | Bangalore

- Completed intensive hands-on training in SQL, Excel, Power BI, and Python
- Gained practical experience in data cleaning, transformation, and analysis
- Built real-world projects involving dashboard creation and data visualization
- Worked on end-to-end analytics projects simulating industry scenarios

CERTIFICATES

Data Analytics Certification | Apponix Academy | 2026

EDUCATION

Bachelor of Engineering (Computer Science), 2021 – 2025 | Mandya | CGPA: 8.5
Mysuru Royal Institute of Technology
